

Call for Participants: SDGs Special Symposium - Research Proposals on SDGs from Youth

The SDGs Special Symposium will be held in hybrid format in the morning of Thursday, July 17, sponsored by the Society of Chemical Engineers, Japan (SCEJ) at the World Congress of Chemical Engineering and Asian-Pacific Confederation of Chemical Engineering Congress ([WCCEI2-APCChE2025](#)) in Beijing, China. All WCCEI2-APCChE2025 participants in Beijing are welcome to attend on-site, and those who have not registered are welcome to attend online for free.

This event is an interactive symposium consisting of invited talks on chemical engineering for sustainability, followed by research proposals from students from around the world on “Contributions from Chemical Engineering to the SDGs.” Then, we will have a participatory workshop and group discussions. This year, 33 students from Europe, Africa, and South America, in addition to the Asia Pacific region, participated in a 4-month online collaboration to develop bottom-up research proposals from unique youth perspectives. We hope you will join us and share your ideas and thoughts.

Event Outline & How to Participate

Date

Thursday 17-Jul, 2025
